PROFILE SUMMARY

Proactive and results-driven software engineer with expertise in Python, Java, and C++. Strong foundation in Data Structures, Algorithms, and AI/ML concepts. Skilled in web development, and collaborative teamwork. Committed to delivering innovative and scalable solutions in dynamic environments.

EDUCATION

Chitkara University **Oct. 2022 – June. 2026**
BE in Computer Science (8.42 CGPA) *Patiala,Punjab*

Blue Bird High School **2018--2019**
Class 10 CBSE (95.2%) *Sector 16, Panchkula*

GMSSS, Mani Majra **2020-2021**
Class 12 CBSE (95.4%) *Mani Majra, Chandigarh*

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Java, JavaScript
- **Web Development:** React, Node.js, Express, RESTful APIs, HTML/CSS
- **Databases:** MongoDB, MySQL
- Operating Systems: Linux, Windows
- **Tools:** Linux, Git/GitHub, Postman, MongoDB Atlas, VS Code
- **Core Competencies:** OOP (Object-Oriented Programming), DSA (Data Structures and Algorithms), Problem Solving
- **Concepts:** Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS)

PROJECTS

Python Games | *Python, Tkinter, Turtle*

- Built a number of games using python, with some implementing the graphical aspects using tkinter and turtle libraries.
- The games were built using simple technologies and the project was a combination of 4 games.
- It used the time function to see that how much time a person has played the games and showed the price as per the time used.
- The user could change the game and start another game if he or she did not want to play it anymore and the price would be added accordingly as per the added summation of the time played.

ECOMART | *MERN, GitHub*

- Built a responsive e-commerce website with a variety of technical gadgets using MERN stack.
- Implemented product listing with search, filter, and sorting functionality for easy navigation.
- Integrated a responsive design ensuring seamless performance across mobile, tablet, and desktop devices.
- Ensured responsiveness across all devices and optimized website performance for faster loading times.
- Designed a user-friendly shopping cart with add/remove functionality and real-time price updates.

ACHIEVEMENTS/EXPERIENCE

- Solved a wide range of data structure and algorithm problems on competitive coding platforms such as LeetCode ,GeeksforGeeks, W3Schools and Coding Ninjas.
- Enhanced algorithmic thinking and problem-solving skills through consistent practice and participation in coding challenges.
- Class Representative of my class in Chitkara University from the start of classes and have a great team spirit.
- A good Grasp on MERN stack as well as HTML, CSS and react along with technologies like bootstrap and SQL.
- Did a variety of co-curricular physical activities as well as internship in Evepaper as Assistant Content Writer.
